

# Rock Cycle Game **Cheat Sheet**

Tips and Tricks

# Best Start Route

Exploring the world can be a little confusing. We recommend visiting these areas in this order.

Once you know the lay of the land, you can explore more freely.

# Music Volume

The music can be pretty loud but you can lower it within the game. Press 'esc' then 'options.' Then lower or raise the volume.

You can also lower the volume of sound effects and other sounds.

# Spells

You must READ a spell to learn it.  
Simple spells can be learned by anyone at any level.

Advanced spells are located at Professor Gee's place. You must reach a certain level to learn them.

# Spells

To use a spell in battle select 'fight' and then 'magic.' Then select the magic and the monster you wish to cast the spell on.

Advanced spells can attack more than one monster and are more powerful.

Heat from deep within the earth is summoned.

Melting 5  
Heat & Pressure 5  
Compaction & Cementation 5

Attack  
Magic  
Guard  
Item

BoBB HP 158/300 MP 35/35

The image shows a battle interface. At the top, a text box reads "Heat from deep within the earth is summoned." Below this, a menu lists three spells: "Melting" (5), "Heat & Pressure" (5), and "Compaction & Cementation" (5). The background shows a large, dark stone monster with glowing orange eyes and a small character with red hair and a blue cape. At the bottom left, a menu lists "Attack", "Magic", "Guard", and "Item". At the bottom right, a status bar for "BoBB" shows "HP 158/300" and "MP 35/35".

# Spells

All spells are based on the rock cycle, and certain spells will be ineffective against certain monsters.

Do you expect 'Melting' to work on a monster made of magma or lava?

The spell you use to slay the monster will determine what it leaves behind.

# Spells

You need to learn spells to defeat the Monsters of the land. Here is where you can find them.

You must learn the basic spells before you can learn the advanced spells.

# Saving

You can save at any point in the game by pressing 'esc' and selecting 'save.' When you return to the title screen, you can choose to start from a previously saved point.

Save your game often. Do not close the browser window or you'll lose all saved game data.

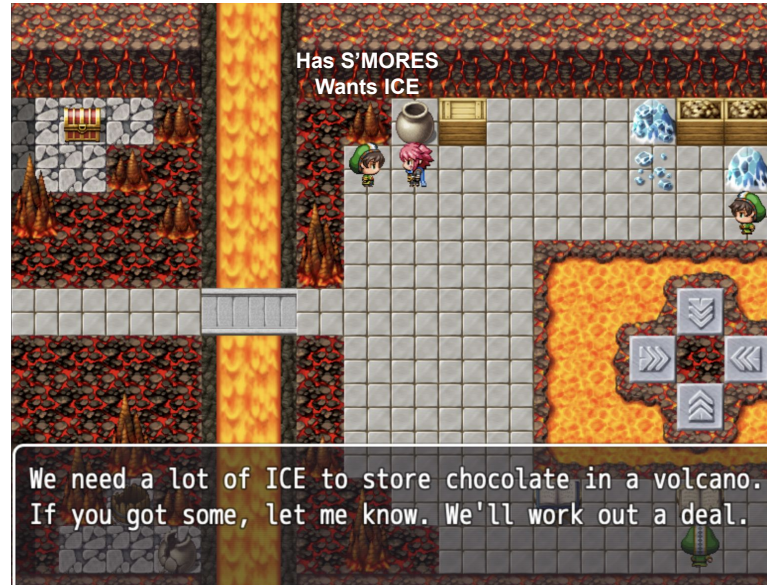

# Trading

Some characters will strike a deal with you to trade for things, like ice, lava, and S'mores.

This is a good way to get S'mores.

You NEED more S'mores.

# Sell & Buy

People have things they want to buy from you. And you want to buy all the S'mores you can afford.

# Items (S'mores)

You use items by pressing 'esc' and selecting 'item.' Then select 'item' AGAIN. Then select S'more to use it.

S'mores will restore health and magic.

# Items (S'mores)

You can use items **during a battle** by selecting 'fight' and then selecting 'item.' Then select S'mores to use them on your next turn.

You may go through several S'mores in a difficult battle.

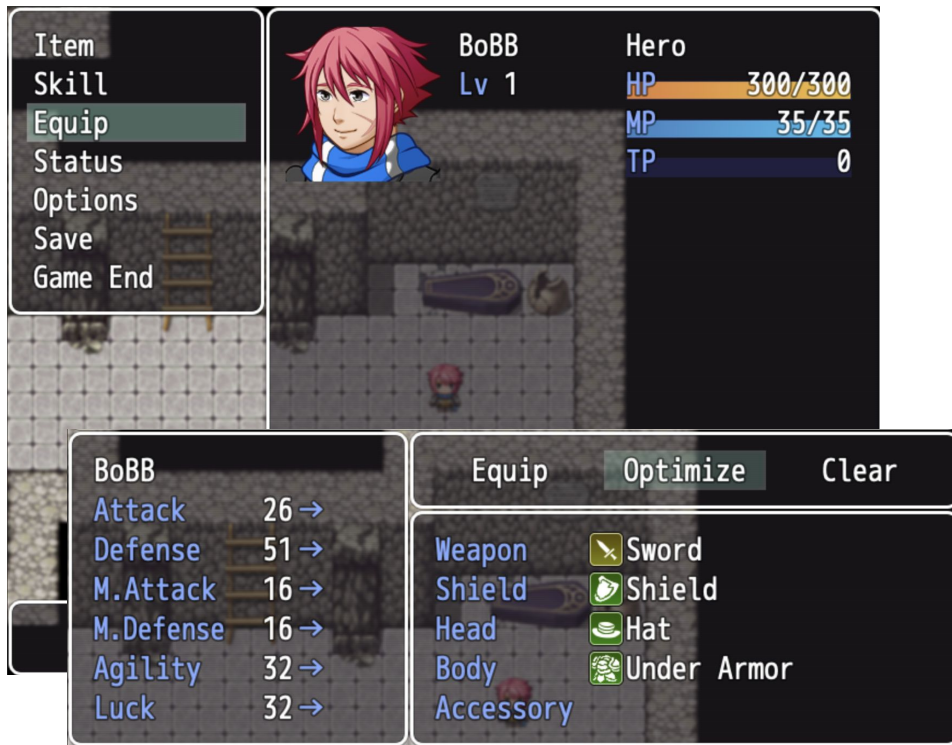

# Equip (Armor)

You can equip armor and weapons by pressing 'esc' and selecting 'equip.' Then select 'optimize.' This will equip the best armor and weapon you have in your inventory.

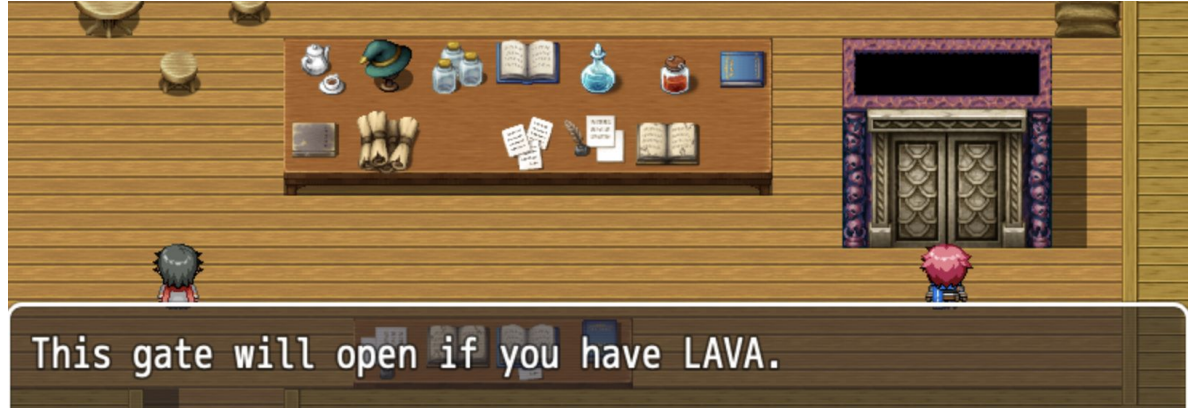

Armor and weapons can be found in treasure chests or dropped by certain powerful monsters.

# Gates

Each gate has specific requirements. For example, The Lava Gate requires that you have lava with you.

You should be level 5, have learned multiple advanced spell, know the weakness of each type of monster, and have a stockpile of S'mores before you go through the gate.

# Hidden Items

There are lots of hidden items in the world that can help you along your journey, if you know where to look.

Even without learning a single spell or defeating a single enemy, you can still get lots of gold and S'mores.

# Escape

It's OKAY to RUN AWAY. If you don't like your chances, you can try to escape. It's easy to escape from rock monsters as they are too slow to chase you.

Sand and Magma Monsters are faster and harder to escape from.

# Strategies for Success

1. READ!!! READ!!! READ!!! (If you don't read, you'll miss important details.)
2. Avoid fighting, escape when you can, while you travel to learn spells and search for hidden items (gold and s'mores). Equip armor and weapons you find.
3. SAVE every time you enter a new area.
4. Fight monsters that are alone.
5. Take advantage of the Lava-Ice-S'more trade to get more S'mores.
6. Sell your igneous rock, metamorphic rock, sedimentary rock, and sediments to get enough gold to buy more S'mores.
7. **Learn which spells work and don't work against certain monsters.**
8. Repeat steps 3-7 to level up. (Slay the Snowman and the Vampire to level up faster.)
9. Learn advance spells to level up faster. (If you don't know where they are, you didn't READ.)
10. When you are level 5 and have lots of S'mores, go through the gate. Run away when you can.

23:51.08

**Speed Run World Record Time**

Just a little under 25 minutes from start to finish.

# Alternative Controls

**Mouse:** Right Click = Esc 'Escape'

**iPad:** Two-Finger Tap = Esc 'Escape'
